DEPARTMENT OF FINANCE 915 L Street Sacramento, CA 95814 IMS Mail Code: A15

BUDGET YEAR 2016-17

BUSINESS UNIT: 6870 COBCP NO. 2 PRIORITY: 2 PROJECT ID: 0000561 (15 digits; for new projects, leave blank)
DEPARTMENT: Board of Governors of Community Colleges
PROJECT TITLE: <u>Reappropriation: Redwoods CCD, College of the Redwoods, Utility Infrastructure</u> Replacement
TOTAL REQUEST (DOLLARS IN THOUSANDS): \$33,146 MAJOR/MINOR: Major
PHASE(S) TO BE FUNDED: C PROJ CAT: CRI CCCI/EPI: 5901 / 3202
SUMMARY OF PROPOSAL: This request seeks to reappropriate the construction phase of the Redwoods Community College District, Utility Infrastructure Replacement project. The working drawings phase of the project was delayed due to the California Geological Survey requiring geotechnical borings and a ground motion study which took longer than planned to complete. The ground borings and ground motion study were finalized on February 2, 2016. The district has worke diligently on the working drawings package since that date and expects to submit the working drawings package to the Division of the State Architect for approval in March 2016.
HAS A BUDGET PACKAGE BEEN COMPLETED FOR THIS PROJECT? (E/U/N/?): N

		BORNELL ARM FOR LOND

Project Specific Proposals: For new projects provide proposed Scope language. For continuing projects provide the latest approved Scope language. Enter Scope language in cell A110.

Conceptual Proposals: Provide a brief discussion of proposal defining assumptions supporting the level of funding proposed by fiscal year in relation to outstanding need identified for that fiscal year. (Also include scope descriptions for BY+1 through BY+4 in cell A110).

It is necessary to relocate and/or reconstruct essential utility infrastructure systems to eliminate life-safety issues and environmental hazards that will arise in the event of an earthquake. This proposal represents the least cost solution to stabilizing the campus infrastructure to maintain the operations at the college in the event of an earthquake. The fire suppression and firefighting water systems, electrical distribution and communication systems, storm water systems, sanitary sewer, wastewater treatment and natural gas systems, mainly constructed in early 1960's, are beyond their useful life and subject to recurring failures. In the event of an earthquake, these systems will fail. Water is stored in two 370,000-gallon redwood tanks that will collapse flooding the campus. Natural gas lines run through the major fault on campus.
